

SOFTWAREUNLIMITED

Our case studies highlight how Information Technology (IT) can be used to enhance your competitive position through reduced costs, improved operational efficiencies and higher levels of customer service.

Case Study: Slow Network

Discover how upgraded computer equipment resulted in greater productivity, improved response times and a 6 month return on investment (ROI).

Client Situation

A company finds that it needs to take advantage of new technologies to improve business productivity and be more competitive.

Client Problem

Accounting system is slow and out of date. Other applications and procedures need improvement. Computer equipment needs to be upgraded.

SoftwareUnlimited Solution

SoftwareUnlimited Manage IT service installs a new network and server, upgrades existing workstations, accounting system, and standardizes word processing and spreadsheet applications. SoftwareUnlimited installs E-mail system and configures communication with remote offices. Remote IT services provide the ability to manage the network from a remote location.

Client Benefit

Improved access to information and faster computer equipment improved employee productivity by 15%. The company experienced a 6 month return on their investment (ROI) as a result of cost savings from quicker application response times, faster printing speed, remote access and Internet access.
